

LIFE SAVING SOLUTIONS FOR YOUR BUSINESS

We face challenges every day: more and more data, numbers, images to be stored, organized, archived, searched, protected. Samples to be processed, lives to be saved, information to be accessed, stored, transmitted. Faster, bigger, better. Flawlessly.

CHALLENGES

The typical error rate for human data entry is 1 error per 300 characters. For barcode scanners, error rate is around 1 error in 36 trillion characters, depending on the type of barcode used.

Human errors and data entry errors can bring irreparable damage to a business leading to: higher costs, unhappy customers, and time spent solving problems. In some situations, errors can be irreparable to a business image and reputation, and in many instances they will involve legal ramifications.

In this industry, customer service and client satisfaction defines the success. Document management, professionalism, speed are key components that will help any insurance agency prevail. Managing documents such as applications, insurance policies, claims, photographs, and reports can be a challenge, especially when dealing with a lot of customers.

Solution: ByteScout BarCode SDK, QR Code SDK, BarCode Reader SDK and Document Parser SDK

PROCESS AUTOMATION

- ByteScout Barcode Generator SDK is used to add barcodes to existing documents to track electronic and printed documents later and identify relation of document to a specific customer or group of customers.
- ByteScout Barcode Reader SDK is used to automate tracking of scanned and electronic documents in pdf, images, tiff formats. Split and merge documents based on found barcodes.
- ByteScout Barcode Generator SDK to automate printing of QR Code or Code 39 / Code 128 barcodes for inventory purposes for physical goods in your office. Track them using Barcode Reader SDK via live camera, from photos, from pdf or pictures.
- Use Document Parser SDK to automate data extraction from large amount of incoming documents using easy to create and update extraction templates.
- QR Code SDK automates printing of QR codes to inventorize your products for improved storage and classification.
- QR Code SDK can add custom QR codes to existing electronic files specifying the customers/groups of customers in order to facilitate docs tracking afterwards.
